

Wellness Services: One-On-One Care

Knowledge, Skill, Passion....We set the standard.

One-on-One care is often required when a resident is unsafe to be left alone for any length of time or requires assistance beyond what can be provided with A La Carte services or enhanced Wellness packages. When continuous monitoring and care are needed, One-on-One care is available.

At MPI Home Care, we have the staff and expertise to care for residents with diverse needs, from simple personal care to skilled care for complex, catastrophic conditions.

Nurse Aides

Our compassionate, reliable, trained and experienced Nurse Aides provide assistance and companionship to keep you or your loved one safe. They assist with activities of daily living to maintain your or your loved one's well-being and independence or provide complete care for residents who are unable to care for themselves due to illness or injury.

A Registered Nurse evaluates each client and determines what services would meet the residents needs and designs an individual plan of care with the client and/or loved ones. The Registered Nurse leads the care team and provides supervisory visits to ensure that the plan of care continues to be appropriate for the resident.

One-On-One Care consists of hourly care day or night, from 4 to 24 hours a day to provide services such as but not limited to:

- Personal care
- Medication reminder
- Meal preparation
- Light housekeeping
- Care of house pets
- Take/Accompany resident to appointments

Registered Nurse or Licensed Practical Nurse

When a resident's condition requires the training, education and experience of a nurse, we have Registered Nurses and Licensed Practical Nurses on staff to provide the care. Our nurse will work closely with, and under the direction of the resident's physician to develop a plan of care to meet the resident's needs.
